Photoshop 5.5 Hotkey Table

Operation	*Shortcut*
Menu commands	
Actual Pixels	Ctrl + Alt + zero (0)
Auto Levels	Ctrl + Shift + L
Bring Layer Forward	Ctrl +]
Bring Layer to Front	Ctrl + Shift +]
Clear	Backspace or Delete
Close	Ctrl + W or Ctrl + F4
Color Balance	Ctrl + B
Color Balance, with last settings	Ctrl + Alt + B
Copy	Ctrl + C or F3
Copy Merged	Ctrl + Shift + C
Curves	Ctrl + M
Curves, with last settings	Ctrl + Alt + M
Cut	Ctrl + X or F2
Desaturate	Ctrl + Shift + U
Exit	Ctrl + Q or Alt + F4
Fade Filter	Ctrl + Shift + F
Feather Selection	**Ctrl + Alt + D** or Shift + F6
Fill	Shift + Backspace or Shift + F5
Fill from history	**Ctrl + Alt + Backspace**
Filter, repeat last	Ctrl + F
Filter, repeat with new settings	Ctrl + Alt + F
Fit on Screen	Ctrl + zero (0)
Free Transform	Ctrl + T
Gamut Warning	Ctrl + Shift + Y
Grid, show or hide	Ctrl + quote (")
Group with Previous Layer	Ctrl + G
Guides, show or hide	Ctrl + semicolon (;)
Help Contents	F1
Help, context-sensitive	Shift + F1
Hide Edges	Ctrl + H
Hide Path	Ctrl + Shift + H
Hue/Saturation	Ctrl + U
Hue/Saturation, with last settings	Ctrl + Alt + U
Image Size	F11
Inverse Selection	Ctrl + Shift + I or Shift + F7
Invert	Ctrl + I
Layer Via Copy	Ctrl + J
Layer Via Cut	Ctrl + Shift + J
Levels	Ctrl + L
Levels, with last settings	Ctrl + Alt + L
Lock Guides	Ctrl + Alt + semicolon (;)
Merge Down	Ctrl + E
Merge Visible	Ctrl + Shift + E
New	Ctrl + N
New, with default settings	Ctrl + Alt + N
New Layer	**Ctrl + Shift + N**

Open	Ctrl + O
Open As	**Ctrl + Alt + O**
Open last edited image	Alt + F, press number (1 through 4)
Page Setup	Ctrl + Shift + P
Paste	Ctrl + V or F4
Paste Into	Ctrl + Shift + V
Preferences	Ctrl + K
Preferences, last panel	Ctrl + Alt + K
Preview CMYK	Ctrl + Y
Print	Ctrl + P
Redo	Ctrl + Z
Reselect	**Ctrl + Shift + D**
Revert	F12 or **click first item in History palette**
Rulers, show or hide	Ctrl + R
Save	Ctrl + S
Save As	Ctrl + Shift + S
Save a Copy	Ctrl + Alt + S
Select All	Ctrl + A
Select None	Ctrl + D
Send Layer Backward	Ctrl + [
Send Layer to Back	Ctrl + Shift + [
Step Backward	**Ctrl + Alt + Z**
Step Forward	**Ctrl + Shift + Z**
Snap to Grid	Ctrl + Shift + quote (")
Snap to Guides	Ctrl + Shift + semicolon (;)
Transform Again	**Ctrl + Shift + T**
Undo	Ctrl + Z
Ungroup Layers	Ctrl + Shift + G
Zoom In	Ctrl + plus (+)
Zoom Out	Ctrl + minus (-)
Navigation	
Scroll image with hand tool	Spacebar + drag or drag in Navigator palette
Scroll up or down one screen	Page Up or Page Down
Scroll up or down slightly	Shift + Page Up or Shift + Page Down
Scroll up or down exactly one frame in Filmstrip file	Shift + Page Up or Shift + Page Down
Scroll left or right one screen	**Ctrl + Page Up or Ctrl + Page Down**
Scroll left or right slightly	**Ctrl + Shift + Page Up or Ctrl + Shift + Page Down**
Switch to upper-left corner	press Home
Switch to lower-right corner	press End
Magnify to custom zoom ratio	Ctrl + spacebar + drag or Ctrl + drag in Navigator palette
Zoom in without changing window size	Ctrl + spacebar + click or Ctrl + plus (+)
Zoom in and change window size to fit	Ctrl + Alt + plus (+)
Zoom out without changing window size	Alt + spacebar + click or Ctrl + minus (-)
Zoom out and change window size to fit	Ctrl + Alt + minus (-)
Zoom to 100%	Ctrl + Alt + zero (0) or double-click zoom tool icon
Fit image on screen	Ctrl + zero (0) or double-click hand tool icon
Apply zoom value but keep magnification box active	Shift + Enter
Cycle through full screen and normal window modes	F
Toggle display of menu bar in full screen modes	**Shift + F**
Painting and editing	
Display Options palette	Enter or double-click tool icon

Display crosshair cursor	Caps Lock
Revert image with magic eraser	Alt + drag with eraser
Select pencil, painbrush, or airbrush	**press N, B, or J**
Cycle through eraser styles	Alt + click eraser tool icon or **Shift + E**
Specify an area to clone	Alt + click with rubber stamp
Cycle through rubber stamp options	Alt + click rubber stamp tool icon or **Shift + S**
Cycle through focus tools	Alt + click focus tool icon or **Shift + R**
Sharpen with the blur tool or blur with the sharpen tool	Alt + drag
Dip into the foreground color when smearing	Alt + drag with smudge tool
Cycle through toning tools	Alt + click toning tool icon or **Shift + O**
Darken with the dodge tool or lighten with the burn tool	Alt + drag
Paint or edit in a straight line	click and then Shift + click
Change opacity, pressure, or exposure in 10% increments	press number (1 through 0)
Change opacity, pressure, or exposure in 1% increments	press two numbers in a row
Select brush mode	right-click with paint or edit tool **or Shift + Alt + letter**
Cycle through brush modes	**Shift + plus (+) or Shift + minus (-)**
Reset to Normal brush mode	**Shift + Alt + N**
Display or hide Brushes palette	F5
Cycle through brush shapes	press bracket, [or]
Switch to first shape in Brushes palette	Shift + [
Switch to last shape in Brushes palette	Shift +]
Delete shape from Brushes palette	Ctrl + click brush shape
Create new brush shape	click in empty area of Brushes palette
Edit brush shape	double-click brush shape
Applying colors	
Lift foreground color from image	Alt + click with paint tool or click with eyedropper
Lift background color from image	Alt + click with eyedropper
Sample color in image	**click with color sampler tool**
Delete color sample	**Alt + click on target with color sampler tool**
Display or hide Color palette	F6
Lift foreground color from color bar at bottom of Color palette	click color bar
Lift background color from color bar	Alt + click color bar
Cycle through color bars	Shift + click color bar
Specify new color bar	right-click color bar or Ctrl + click for dialog box
Lift foreground color from Swatches palette	click swatch
Lift background color from Swatches palette	Alt + click swatch
Delete swatch from palette	Ctrl + click swatch
Replace swatch with foreground color	Shift + click swatch
Add new swatch to palette	click in empty area of palette or Shift + Alt + click on swatch
Fill selection or layer with foreground color	Alt + Backspace
Fill layer with foreground color but preserve transparency	Shift + Alt + Backspace
Fill selection on background layer with background color	Backspace or Delete
Fill selection on any layer with background color	Ctrl + Backspace
Fill layer with background color but preserve transparency	Shift + Ctrl + Backspace
Fill selection with source state in History palette	**Ctrl + Alt + Backspace**
Display Fill dialog box	Shift + Backspace or Shift + F5
Type	
Edit text layer	**double-click on T in Layers palette or right-click with type tool**
Select word in Text Tool dialog box	double-click on word
Select word to left or right	**Ctrl + Shift + left or right arrow**

Select all text	**Ctrl + A**
Increase type size two pixels (or points)	**Ctrl + Shift + greater than (>)**
Decrease type size two pixels	**Ctrl + Shift + less than (<)**
Increase type size 10 pixels	**Ctrl + Shift + Alt + greater than (>)**
Decrease type size 10 pixels	**Ctrl + Shift + Alt + less than (<)**
Tighten leading two pixels	**Alt + up arrow**
Expand leading two pixels	**Alt + down arrow**
Tighten leading 10 pixels	**Ctrl + Alt + up arrow**
Expand leading 10 pixels	**Ctrl + Alt + down arrow**
Kern together 2/100 em	**Alt + left arrow**
Kern apart 2/100 em	**Alt + right arrow**
Kern together 1/10 em	**Ctrl + Alt + left arrow**
Kern apart 1/10 em	**Ctrl + Alt + right arrow**
Raise baseline shift two pixels	**Shift + Alt + up arrow**
Lower baseline shift two pixels	**Shift + Alt + down arrow**
Raise baseline shift 10 pixels	**Ctrl + Shift + Alt + up arrow**
Lower baseline shift 10 pixels	**Ctrl + Shift + Alt + down arrow**
Exit Type Tool dialog box	Enter on keypad or **Ctrl + Enter**
Left-align text	**Ctrl + Shift + L**
Center-align text	**Ctrl + Shift + C**
Right-align text	**Ctrl + Shift + R**
Magnify view in Text Tool dialog box	**Ctrl + plus (+)**
Zoom out in Text Tool dialog box	**Ctrl + minus (-)**
Selections	
Select everything	Ctrl + A
Deselect everything	Ctrl + D
Restore selection after deselecting	**Ctrl + Shift + D**
Hide or show marching ants	Ctrl + H
Feather the selection	**Ctrl + Alt + D** or Shift + F6
Reverse the selection	Ctrl + Shift + I or Shift + F7
Cycle through all marquee tools (including crop tool)	Alt + click marquee tool icon
Toggle between rectangular and elliptical marquees	**Shift + M**
Draw out from center with marquee tool	Alt + drag
Constrain marquee to square or circle	press Shift while drawing shape
Move marquee as you draw it	press spacebar
Cycle through lasso tools	Alt + click lasso tool icon or **Shift + L**
Add corner to straight-sided selection outline	Alt + click with lasso tool or click with polygonal lasso
Add point to magnetic selection	**click with magentic pen tool**
Delete last point added with magnetic lasso tool	**Backspace**
Increase or reduce magnetic lasso width	**press bracket, [or]**
Close polygon or magnetic selection	double-click with respective lasso tool or press Enter
Close magnetic selection with straight segment	**Alt + double-click or Alt + Enter**
Cancel polygon or magnetic selection	press Escape
Add to selection	Shift + drag or Shift + click with selection tool
Subtract from selection	Alt + drag or Alt + click with selection tool
Retain intersected portion of selection	Shift + Alt + drag or Shift + Alt + click with selection tool
Add character outlines to a selection	Shift + click with type mask tool
Cut letter-shaped holes into a selection	Alt + click with type mask tool
Retain areas where character outlines and selection intersect	Shift + Alt + click with type mask tool
Select move tool	press V or press and hold Ctrl
Move selection	drag with move tool or Ctrl + drag with other tool

Constrain movement vertically or horizontally	press Shift while dragging selection
Move selection in 1-pixel increments	Ctrl + arrow key
Move selection in 10-pixel increments	Ctrl + Shift + arrow key
Clone selection	Alt + drag selection with move tool or Ctrl + Alt + drag with other tool
Clone selection in 1-pixel increments	Ctrl + Alt + arrow key
Clone selection in 10-pixel increments	Ctrl + Shift + Alt + arrow key
Clone selection to different image	Ctrl + drag selection from one window and drop it into another
Move selection outline independently of its contents	drag with selection tool
Move selection outline in 1-pixel increments	press arrow key when selection tool is active
Move selection outline in 10-pixel increments	Shift + arrow key when selection tool is active
Copy empty selection outline to different image	drag selection from one window into another with selection tool
Change opacity of floating selection	**Ctrl + Shift + F**
Paste image into selection	Ctrl + Shift + V
Paste image behind selection	Ctrl + Shift + Alt + V
Layers	
Display or hide Layers palette	F7
View single layer by itself	Alt + click eyeball icon in Layers palette
Create new layer and set blend options	Alt + click page icon at bottom of Layers palette or **Ctrl + Shift + N**
Create new layer and bypass blend options	click page icon at bottom of Layers palette or **Ctrl + Shift + Alt + N**
Clone selection to new layer	Ctrl + J
Convert selection to new layer and leave hole behind	Ctrl + Shift + J
Convert floating selection to new layer	Ctrl + Shift + J
Diplicate layer to new layer	drag layer name onto page icon or Ctrl + A, Ctrl + J
Ascend one layer	Alt +]
Descend one layer	Alt + [
Ascend to top layer	Shift + Alt +]
Descend to background layer	Shift + Alt + [
Go directly to layer that contains specific image	Ctrl + Alt + right-click image with any tool
Preserve transparency of active layer	press slash (/)
Convert layer's transparency mask to selection outline	Ctrl + click layer name in Layers palette
Add transparency mask to selection	Ctrl + Shift + click layer name
Subtract transparency mask from selection	Ctrl + Alt + click layer name
Retain intersection of transparency mask and selection	Ctrl + Shift + Alt + click layer name
Move entire layer	drag with move tool or Ctrl + drag with other tool
Move entire layer in 1-pixel increments	Ctrl + arrow key
Move entire layer in 10-pixel increments	Ctrl + Shift + arrow key
Bring layer forward one level	Ctrl +]
Bring layer to front of file	Ctrl + Shift +]
Send layer backward one level	Ctrl + [
Send layer to back, just above the background layer	Ctrl + Shift + [
Link layer with active layer	click in front of layer name
Unlink layer from active layer	click on chain icon in front of layer name
Unlink all layers from active layer	Alt + click on brush icon in front of active layer name
Change opacity of active layer in 10% increments	press number (1 through 0) when selection tool is active
Change opacity of active layer in 1% increments	press two numbers in a row when selection tool is active
Edit blend options for layer	double-click layer name in Layers palette
Select blend mode	**Shift + Alt + letter**

Cycle through blend modes	**Shift + plus (+) or Shift + minus (-) when selection tool is active**
Reset to Normal blend mode	**Shift + Alt + N**
Adjust "fuzziness" in Layer Options dialog box	Alt + drag slider triangle
Merge layer with next layer down	Ctrl + E
Merge linked layers	Ctrl + E
Merge all visible layers	Ctrl + Shift + E
Copy merged version of selection to Clipboard	Ctrl + Shift + C
Clone contents of layer into next layer down	Ctrl + Alt + E
Clone contents of linked layers to active layer	Ctrl + Alt + E
Clone contents of all visible layers to activate layer	**Ctrl + Alt + Shift + E**
Group neighboring layers	Alt + click horizontal line in Layers palette or Ctrl + G
Ungroup neighboring layers	Alt + click dotted line in Layers palette or Ctrl + Shift + G
Switch between layer effects in Effects dialog box	**Ctrl + 1 through Ctrl + 5**
Switch between layer effects outside dialog box	**right-click on ƒ in Layers palette**
Edit layer effect	**double-click on ƒ**
Move shadow when Effect dialog box is open	**drag in image window**
Disable last layer effect	**Alt + double-click on ƒ**
Disable specific layer effect	**Alt + choose command from Layer >> Effects submenu**
Create adjustment layer	Ctrl + click page icon at bottom of Layers palette
Save flattened copy of layered image	Ctrl + Alt + S

Channels and masks

Switch between independent color and mask channels	Ctrl + 1 through Ctrl + 9
Switch to composite color view	Ctrl + tilde (~)
Activate or deactivate color channel	Shift + click channel name in Channels palette
Create channel mask filled with black	click page icon at bottom of Channels palette
Create channel mask filled with black and set options	Alt + click page icon at bottom of Channels palette
Create channel mask from selection outline	click mask icon at bottom of Channels palette
Create channel mask from selection outline and set options	Alt + click mask icon at bottom of Channels palette
View channel mask as Rubylith overlay	click top eyeball in Channels palette or press tilde(~)
Convert channel mask to selection outline	Ctrl + click channel name in Channels palette or Ctrl + Alt + number (1 through 0)
Add channel mask to selection	Ctrl + Shift + click channel name
Subtract channel mask from selection	Ctrl + Alt + click channel name
Retain intersection of channel mask and selection	Ctrl + Shift + Alt + click channel name
Enter or exit quick mask mode	press Q
Toggle quick mask color over masked or selected area	Alt + click quick mask icon in toolbox
Change quick mask color overlay	double-click quick mask icon
View quick mask independently of image	click top eyeball in Channels palette or press tilde(~)
Create layer mask filled with white	click mask icon at bottom of Layers palette
Create layer mask filled with black	Alt + click mask icon
Create layer mask from selection outline	click mask icon
Create layer mask that hides selection	Alt + click mask icon
Switch focus from layer mask to image	Ctrl + tilde (~)
Switch focus from image to layer mask	Ctrl + backslash (\)
View layer mask independently of image	Alt + click layer mask thumbnail in Layers palette or press backslash (\) then tilde (~)
View layer mask as Rubylith overlay	Shift + Alt + click layer mask thumbnail or press backslash (\)
Disable layer mask	Shift + click layer mask thumbnail
Toggle link between layer and layer mask	click between layer and mask thumbnails in Layers palette
Convert layer mask to selection outline	Ctrl + click layer mask thumbnail or Ctrl + Alt + backslash (\)

Add layer mask to selection	Ctrl + Shift + click layer mask thumbnail
Subtract layer mask from selection	Ctrl + Alt + click layer mask thumbnail
Retain intersection of layer mask and selection	Ctrl + Shift + Alt + click layer mask thumbnail
Add spot color channel	**Ctrl + click page icon at bottom of Channels palette**

Paths

Select pen tool	press P
Cycle between standard, freeform, and magnetic pen tools	**Shift + P**
Select insert point tool	**press plus (+)**
Select remove point tool	**press minus (-)**
Add corner to path	click with pen tool or **Alt + click with freeform pen tool**
Add smooth arc to path	drag with pen tool
Add cusp to path	drag with pen tool, then Alt + drag same point
Add point to magnetic selection	**click with magentic pen tool**
Delete last point added with standard or magentic pen tool	Backspace
Draw freehand path segment	**drag with freeform pen tool or Alt + drag with magnetic pen tool**
Increase or reduce magnetic pen width	**press bracket, [or]**
Close magnetic selection	**double-click with magnetic pen tool or click on first point in path**
Close magnetic selection with straight segment	**Alt + double-click or Alt + Enter**
Cancel magnetic or freeform selection	**press Escape**
Select arrow (direct selection) tool	**press A** or press and hold Ctrl when pen tool is active
Select insert or remove point tool	**press plus (+) or minus (-)**
Move selected points	drag point with arrow tool or Ctrl + drag with pen tool
Select multiple points in path	Shift + click point with arrow or Ctrl + Shift + click with pen
Select entire path	Alt + click path with arrow or Ctrl + Alt + click with pen
Clone path	Alt + drag path with arrow or Ctrl + Alt + drag with pen
Convert corner or cusp to smooth arc	**Ctrl + Alt + drag point with arrow or Alt + drag with pen**
Convert arc to corner	**Ctrl + Alt + click point with arrow or Alt + click with pen**
Convert arc to cusp	**Ctrl + Alt + drag handle with arrow or Alt + drag with pen**
Insert point in path	**click segment with pen tool or Alt + click with remove point tool**
Remove point from path	**click point with pen tool or Alt + click with insert point tool**
Convert path to selection outline	Ctrl + click path name in Paths palette or press Enter on keypad when selection or path tool is active
Add path to selection	Ctrl + Shift + click path name or Shift + Enter on keypad
Subtract path from selection	Ctrl + Alt + click path name or Alt + Enter on keypad
Retain intersection of path and selection	Ctrl + Shift + Alt + click path name or Shift + Alt + Enter on keypad
Apply brushstroke around perimeter of path	press Enter on keypad when paint or edit tool is active
Revert around perimeter of path	press Alt + Enter on keypad when eraser tool is active **or Enter when history brush is active**
Save path for future use	double-click Work Path item in Paths palette
Hide path (it remains active)	Ctrl + Shift + H
Deactivate path	click in empty portion of Paths palette

Crops and transformations

Select crop tool	press C
Move cropping boundary	drag inside boundary
Resize cropping boundary	drag boundary handle
Rotate cropping boundary	drag outside boundary

Accept crop	double-click inside boundary or press Enter
Cancel crop	press Escape
Freely transform selection or layer	Ctrl + T
Duplicate selection and freely transform	Ctrl + Alt + T
Move image in Free Transform mode	drag inside boundary
Move transformation origin	**drag crosshair target**
Resize image	drag boundary handle
Resize with respect to origin	**Alt + drag boundary handle**
Rotate image (always with respect to origin)	drag outside boundary
Skew image	Ctrl + drag side handle
Skew image along constrained axis	Ctrl + Shift + drag side handle
Skew image with respect to origin	**Ctrl + Alt + drag side handle**
Skew image along constrained axis with respect to origin	**Ctrl + Shift + Alt + drag side handle**
Distort image	Ctrl + drag corner handle
Symmetrically distort opposite corners	Ctrl + Alt + drag corner handle
Constrained distort for perspective effect	Ctrl + Shift + drag corner handle
Constrained distort for symmetrical perspective effect	Ctrl + Shift + Alt + drag corner handle
Apply specific transformation in Free Transform mode	right-click in image window
Accept transformation	double-click inside boundary or press Enter
Cancel transformation	press Escape
Replay last transformation	**Ctrl + Shift + T**
Duplicate selection and replay last transformation	**Ctrl + Shift + Alt + T**

Rulers, measurements, and guides

Display or hide rulers	Ctrl + R
Display or hide Info palette	F8
Change unit of measure	drag from X,Y pop-up in Info palette or double-click ruler
Select measure tool	**press U**
Measure distance and angle	**drag with measure tool**
Move measure line	**drag measure line**
Change length and angle of measure line	**drag point at either end of measure line**
Measure angle between two lines (protractor option)	**Alt + drag endpoint**
Display or hide guides	Ctrl + semicolon (;)
Create guide	drag from ruler
Move guide	drag guide with move tool or Ctrl + drag with other tool
Toggle horizontal guide to vertical or vice versa	press Alt while dragging guide
Snap guide to ruler tick marks	press Shift while dragging guide
Toggle guide magnetism	Ctrl + Shift + semicolon (;)
Lock or unlock guides	Ctrl + Alt + semicolon (;)
Display or hide grid	Ctrl + quote (")
Toggle grid magnetism	Ctrl + Shift + quote (")
Edit guide color and grid increments	Ctrl + double-click guide

Filters

Repeat filter with last-used settings	Ctrl + F
Repeat filter with different settings	Ctrl + Alt + F
Scroll preview box in corrective filter dialog boxes	drag in preview box or click in image window
Zoom preview box in corrective filter dialog boxes	Ctrl + click and Alt + click
Increase selected Option - box value by 1 (or 0.1)	up arrow
Decrease value by 1 (or 0.1)	down arrow
Increase value by 10 (or 1)	Shift + up arrow
Decrease value by 10 (or 1)	Shift + down arrow
Adjust Angle value (where offered) in 15° increments	Shift + drag in Angle wheel

Reset options inside corrective filter dialog boxes	Alt + click Cancel button
Clone light in Lighting Effects dialog box	Alt + drag light
Delete Lighting Effects light	press Delete
Adjust size of footprint without affecting angle of light	Shift + drag handle
Adjust angle of light without affecting size of footprint	Ctrl + drag handle
Switch between arrow tools in 3D Transform dialog box	**press V or A, or Ctrl + Tab**
Select 3D cube, sphere, or cylinder tool	**press M, N, or C**
Edit shape with pan camera or trackball	**press E or R**
Delete selected 3D Transform shape	**Backspace**

Advanced color corrections

Add point in Curves dialog box	click on graph line
Add specific color as new point on composite curve	**Ctrl + click in image window**
Add color as new point on independent channel curves	**Ctrl + Shift + click in image window**
Nudge selected curve point	**press arrow key**
Select next curve point	**Ctrl + tab**
Select previous curve point	**Ctrl + Shift + tab**
Delete curve point	**Ctrl + click point**
Select multiple curve points	**Shift + click point**
Deselect all points	**Ctrl + D**
Move Hue/Saturation range to new location	**click in image window**
Add colors to Hue/Saturation range	**Shift + click or drag in image window**
Subtract colors from Hue/Saturation range	**Alt + click or drag in image window**
Edit all colors in Hue/Saturation dialog box	**Ctrl + tilde (~)**
Edit predefined color range	**Ctrl + 1 through Ctrl + 6**

Undoing operations

Undo or redo last operation	Ctrl + Z
Undo operation prior to last one	**Ctrl + Alt + Z**
Redo undone operation	**Ctrl + Shift + Z**
Undo to specific point	**click on item in History palette**
Duplicate previously performed operation	**Alt + click on item in History palette**
Select state to revert to with history brush	**click in front of item in History palette**
Create snapshot from active state	**click page icon at bottom of History palette**
Create duplicate image from active state	**click ... box icon at bottom of History palette**
Revert to saved image	F12 or **click first item in History palette**

Miscellaneous

Display or hide all palettes, and toolbox, and status bar	Tab
Display or hide palettes except toolbox	Shift + Tab
Hide toolbox and status bar	Tab, Shift + Tab
Move a panel out of a palette	drag panel tab
Snap palette to edge of screen	Shift + click palette title bar
Fully collapse palette	Alt + click collapse box or double-click panel tab
Display or hide Actions palette	F9
Play script	Ctrl + double-click on item in Actions palette
Permanently delete item from palette that includes trash can	Alt + click trash can
Preview how image sits on printed page	click preview box
View size and resolution of image	Alt + click preview box
Change the preference settings	Ctrl + K
Display last used Preferences dialog box panel	Ctrl + Alt + K
Bring up dialog box with last-used settings	Alt + choose command from Image >> Adjust submenu
Duplicate image and bypass dialog box	Alt + choose Image >> Duplicate
Cancel the current operation	Escape

Activate No button when closing image	press N
Activate Don't Save or Don't Flatten button	press D
