

## Installation for the Adobe® Photoshop® Lightroom® 5 Presets

*Note: These presets are only compatible with Lightroom 5*

1. Open Lightroom 5
2. Go to the Preferences
3. Click on the Presets tab
4. Click on the button "Show Lightroom Presets Folder..."
5. Inside of this folder is a folder named Develop Presets. The Develop Presets folder is where your presets should go.
6. Open the Creative Companion 4 folder and choose Adobe Photoshop Lightroom 5 Presets folder.
7. Inside of this folder are several folders starting with onOne (*onOne Grunge, onOne Instantastic...*). These are new categories of presets. Drag and drop them into the Develop Presets folder on your computer.
